

We are looking for a talented

Full Stack Developer

with strong javascript related knowledge for continuous development on our main touch based products with the core dev team and also for participating in other projects for the delight of variety.

What you can expect:

- Be in green field projects from the beginning
- Take part in the development of our existing systems, which are widely used in stores across Europe, Russia and the United States
- Involvement in the whole development cycle – environment and technological planning, product control and maintenance strategy and of course writing the production ready code with tests
- Senior colleagues to share and learn knowledge, to be able to use cutting edge technologies and out of the box ideas
- Nice team spirit, forward thinking, excellent office and environment

What we expect:

- 2+ years of professional development experience with JavaScript
- Expertise with at least one modern client side framework, like Angular, Backbone, Ember, React, etc. (Angular preferred)
- Experience with NodeJS and ability to use NodeJS based frameworks
- Ability to build a custom solution from scratch to the tests
- Well formed, self documenting code writing skills supported with willingness for unit and e2e test
- 2+ years Unix based system knowledge
- Deployment and build tool experience
- Familiarity with GIT or some team source control
- Good communication skills, precision, capability to work in a team, comitted personality
- Innovative attitude, interest in new solutions, open to use new technologies
- Professional English language skills

Advantage:

- Experience in messaging and job processing systems (Celery, Redis, Socket.IO)
- HTML and CSS templating knowledge
- Python, C experience

What we offer:

- Outstanding benefits package and bonus scheme
- Varied, challenging and exciting tasks
- Modern environment

Location of work:

Budapest
